

## Menopause 101 Webinar:

# Different paths to menopause

## Hysterectomies, PCOS, endometriosis, & more

Reproductive and other health conditions can influence the symptoms and onset of peri/menopause. Those with hysterectomies, PCOS, endometriosis, and/or other conditions may wonder how these might affect their menopause experience. Join Progyny alongside a menopause specialist to learn how health conditions can impact symptoms, and available treatment options.

### Join this session with a menopause specialist to learn:

- Common menopause symptoms & available treatment options, including hormonal, non-hormonal, and lifestyle plans
- How reproductive and other health conditions may influence peri/menopause
- Available care through Progyny to help you find relief
- Answers to your top questions with a live Q&A

Learn how your Progyny benefit can connect you to personalized support and care you deserve.

## Thursday, April 16 | 3:00 pm ET
